AVTECH & Room *Alert*... Environment Monitoring Made Easy!

Environment factors can cause major problems for your critical facilities and assets. Temperature, humidity, flood, power, smoke, and other environmental conditions can negatively affect data centers, warehouses, manufacturing, and facilities of all types. Even a slight change in temperature or humidity, or the introduction of water or smoke, can spell disaster for valuable equipment, property, or the business.

AVTECH has spent more than the last 30 years providing solutions that proactively monitor the environment and help warn of changes that might cause problems. Our products are helping protect facilities in 186 of 196 countries, 98% of the Fortune 1000, the United Nations, Pentagon, FBI, and thousands of other facilities worldwide. You can trust Room Alert to help protect your critical facilities and assets.

Room *Alert* Monitors

Room Alert monitors environmental conditions such as temperature, humidity, power, flood / water leakage, smoke / fire, air flow, room entry, motion and more. With multiple models available, there are options available for any size or type of facility. Room Alert provides immediate notification of environment changes, logging and reporting to identify trends, and some models can even trigger actions to help mitigate the introduction of unwanted environment factors.

Room *Alert* Sensors

AVTECH offers a wide range of sensors to monitor any number of environment conditions. No matter what type of facility you have, sensors combined with our monitors can protect your most important assets. Our sensors include:

- Digital Temperature
- Digital Outdoor Temperature
- Digital Fluid Temperature
- Digital Humidity
- Digital Active Power
- Main / UPS Power
- Current Loops (Amperage)
- Flood / Water Leakage
- Heat Index (Feels Like)
- Dew Point
- Smoke / Fire
- Fuel / Water Tank Level
- Air Flow, Motion
- Door / Room Entry

Room *Alert* Account

Monitor unlimited Room Alert devices easily and effectively with AVTECH's RoomAlert.com Account service. The RoomAlert.com portal is accessed through any internet-accessible device. This enables our customers to see the status of their most important facilities and assets from anywhere at any time. Define reports on historical data, track trends, set up custom alerts, view map locations, and much more at the office, at home, or on the road with RoomAlert.com.

Manage Devices... Anywhere... Anytime!™ Easily, conveniently and securely online.

The Most Advanced Solution For Monitoring **Room Alert®**

The RoomAlert.com Account portal is designed to make it easy to monitor temperature and environmental conditions from anywhere, at any time, online via the web. Enjoy the same alert interface from any device.

RoomAlert.com is designed specifically to assist with monitoring temperature and other environmental conditions without the worries of installing software or running regular data backups. RoomAlert.com handles all of this automatically online, with a user experience that is always consistent whether on a desktop, laptop, tablet or mobile device.

RoomAlert.com logs all sensor data for historical review, analysis and verification. Easy CSV export allows in-house data collection and local manipulation to meet regulatory reporting requirements or management objectives. Users can display values over time on a graph for any of their connected devices. Time and date ranges are adjustable and interactive with zoom features to explore data at detailed levels. An export to PDF option allows snapshot views to be created and saved on the fly.

Alerts are easy to configure and do not require access to an email server or other external service. Simply enter the desired email or SMS address to notify and the conditions that should trigger an alert and RoomAlert.com will do the rest. RoomAlert.com allows users to get notified and respond appropriately before alert conditions impact their operations or facilities. This provides peace-of-mind for managers and users that all is well when they are away.

Featuring our patent-pending **Monitor360™** technology

Room Alert now takes proactive monitoring one step further with the new patent-pending **Monitor360** technology to help users better react to possible environment concerns in their facility. **Monitor360** gives each Room Alert user the ability to create their own virtual sensors, alerts, and reports using countless combinations of the sensors available to them, providing an unparalleled level of proactive monitoring.

Current Loop 1 (0-50A)

RMA-CL1-SEN

- Monitors electrical current flowing through a single-phase powered cable.
- Monitor output: 0-10A, 0-20A & 0-50A.
- Connects via Room Alert Analog Sensor Port or Digital Temperature & Analog Sensor.
- Operates in 0 - 95% RH, non-condensing environment.
- Low-voltage 2-wire cable connection.
- Compatible with Room Alert 32E/W, 12E & Digital Temperature & Analog Sensor.

INCLUDES: Current Loop 1 With 25' Cable, Mounting Screws & Installation Note.

\$85

Current Loop 2 (0-250A)

RMA-CL2-SEN

- Monitors electrical current flowing through a single-phase powered cable.
- Monitor output: 0-100A, 0-200A & 0-250A.
- Connects via Room Alert Analog Sensor Port or Digital Temperature & Analog Sensor.
- Operates in 0 - 95% RH, non-condensing environment.
- Low-voltage 2-wire cable connection.
- Compatible with Room Alert 32E/W, 12E & Digital Temperature & Analog Sensor.

INCLUDES: Current Loop 2 With 25' Cable, Mounting Screws & Installation Note.

6 Reasons To Monitor IT & Facility Environments

1) Know Immediately If And When Problems Arise

Knowing what happens on a timely basis is the most important part of managing and responding appropriately, whether protecting people, product or processes.

2) Reduce Or Eliminate Downtime

Organizations of all types and sizes must remain online and operating to be relevant. In today's world, being offline leads people to do business elsewhere.

3) Maintain Maximum Energy And Resource Efficiency

Equipment and processes consume resources that cost money. The difference between profitability and going out of business can often be traced to efficiency.

4) Protect And Extend The Life Of Equipment, Product And Property

Whether managing IT equipment, consumable goods or the structure housing a business, getting maximum use and life out of valuable resources is vital.

5) Maximize Reliability For Users And Peace-Of-Mind For Managers

All organizations have people that depend on and manage resources that make business possible. High dependability increases productivity and reduces stress.

6) Stay Online And Open For Business

If a business goes offline internally or externally, people and processes are immediately interrupted. When this occurs, business stops and customers move on.
